

# EPSON COLOR PRINT COST ESTIMATOR

This is an estimate only. Actual print costs will be emailed to you when your job is ready for pick-up. We cannot be responsible for errors in calculation.

## COLOR INK JET PRINTS

### 1. Determine your paper cost:

- PAPER:  student's own or previously purchased from BAP  
 roll paper\*  
 Moab Entrada, natural, 290 gsm (\$4/foot)  
 Somerset Velvet, radiant white, 300 gsm (\$6 per foot)  
 EPSON Professional Matte (\$2 per foot)

\* Roll paper is 24" wide, cost is determined by the length used

PAPER COST (length used (ft) x cost per foot): \_\_\_\_\_ (ft) x \_\_\_\_\_ (\$) in = \$ \_\_\_\_\_

### 2. Determine your printable area (per sheet/side):

APPROXIMATE SIZE OF PRINTABLE AREA: \_\_\_\_\_ (w) x \_\_\_\_\_ (h) in = \_\_\_\_\_ in<sup>2</sup>

### 3. Determine your approximate cost per sheet:

TOTAL INK COST (printable area (in<sup>2</sup>) x \$2): \_\_\_\_\_ x \$2 = \$ \_\_\_\_\_

Please note, minimum ink costs are \$5. If your total costs are less than \$5, the charge will be \$5.
